**Artificial Womb Zine Issue #1 - #13 (2015 – 2016)****Editor: Luca Hine (new name)**

Artificial Womb zine's byline is that it is the 'feminist arts zine that pays its contributors' – which it drops in the final issue in this set (although the zine and collective continued until 2022 afaik), and editor Luca Hine (going by his former name in these issues) discusses in his editor letter that a shift to offering the option to contributors to donate their £10 fee back to the collection reflects not that they've stopped believing in paying artists but that 'it's not sustainable to keep trying to make this a magazine. It's a zine, and that's okay. I accept the help.' I think its interesting to think about the different publishing models collaborative zines use – and artificial womb started with a kickstarter to fundraise, which some zinesters disparage online but I've never really had a problem with?

Illustrated examples of non-human animals which disrupt binary and essentialist ideas of sex and gender. The back page makes explicit the significance with a quote from Anne Fausto-Sterling's book *Sexing the Body: Gender, Politics and the Construction of Sexuality*: 'Scientists do not simply read nature to find truths to apply in the social world. Instead they use truths taken from our social relationships to structure, read and interpret the natural'.

**Issue One**

Capturing some of the immediate aftermath of the Brexit referendum, this zine brings together contributions from people who voted to remain, as well as tweets, Instagram posts, facebook posts, whatsapp chats. I don't know how to explain it, but I feel a certain amount of like, hesitancy or second hand embarrassment, umm I guess the only way I can think to describe it is like this zine was made by Kevin from Motherland, who I actually like as a character but definitely voted lib dem.

“CHIiversity is a grassroots community-building, diversity, and inclusion campaign organised by fempower.tech since 2017. It was created by the group because we felt we needed to create more space for us to discuss feminist ideas, develop solidarity communities, to meet other likeminded people, and to have spaces to retreat to during the sometimes overwhelming CHI [Human factors in technology] conference.”
